

GAME ON! FIRST-CLASS ENTERTAINMENT THANKS TO MINIMAL LATENCY

Greentube and Interxion guarantee maximum user experience

CHALLENGE:

- Setup and preparation of a secure and permanently available infrastructure

SOLUTION:

- Hosting the infrastructure at Interxion

ADVANTAGES:

- ISO-27001 certification
- Continuous availability for uninterrupted operation
- Maximum security and protection of all data and services
- Scalable systems for increased demand
- Access to a large number of providers

Greentube was founded in Austria in 1997 and has been an integral part of the country's gaming scene for over 20 years. During this time, the company has established itself as a hugely successful developer of online and mobile games, with a presence in several global markets. Its recipe for success largely lies in an overarching focus on quality. With Interxion as their colocation provider, Greentube is accompanied by a partner that meets their high requirements while also acting sustainably.

Sustainable security

Greentube specialises in the development and distribution of online and mobile games and its first steps into the sector was with the launch of the 3D sports game "Ski Challenge", which was first introduced in 1998. Since then, Greentube's extensive games portfolio has significantly evolved to include online adaptations of land-based titles as well as new innovative casino content and bingo games. As well as developing games for the B2B gaming sector, Greentube also operates social casinos. With more than 1 million hits per second, the provider's IT team of more than 70 people must have a continuously available, fail-safe infrastructure at its disposal. Since its foundation in 1997, the company, which now belongs to the NOVOMATIC Group, has been committed to offering premium entertainment - at the highest level and the best quality. This also includes top-level requirements in terms of security and sustainability. In the search for a suitable colocation provider, Interxion was a natural choice.

Interxion is certified in accordance with the comprehensive and strictly applicable international ISO / IEC 27001 standard (Information Security Management) which was developed for the long-term maintenance of availability, integrity and confidentiality of data and information. The testing and certification in accordance with ISO 27001 focuses on all business areas

ABOUT GREENTUBE

including physical infrastructure, data centre security, access management, personnel training, communication and work processes, compliance with legal criteria as well as backup and disaster recovery systems. Thanks to its more than 20 years of experience in operating and designing innovative and energy-saving data centres, Interxion offers the highest standards in terms of security: 100 percent of the electricity requirements are covered by renewable energies including water, solar and wind power. Interxion is continuously working to optimise its energy efficiency and to reduce its own CO2 footprint.

Locally anchored, globally successful

Pradeep Kumar, Head of IT at Greentube, said: “Interxion is the largest and safest data centre in Austria - and additionally base their entire energy consumption on renewable energies. It was therefore a logical step for us to choose Interxion as a colocation provider. Interxion is also outstanding for its first-class service, top connectivity and direct connection to a large number of clouds.”

Martin Madlo, Managing Director at Interxion Austria, said: “We are pleased to have had Greentube, a successful Austrian company, as one of our customers for more than five years now, and through them being able to ensure top-level gaming enjoyment for gamers worldwide.”
