JUNDIAÍ CAMPUS

Jundiaí Campus

The city of Jundiaí is known for being an important logistics and industrial hub in Brazil. To meet the IT demands of companies interested in expanding their foothold in the region, we have built a data center campus with the latest technologies available in the market.

The campus currently has two data centers totaling 29 MW power capacity and 172,000 sq ft of space. In addition to the high quality and redundancy of the infrastructure, the data centers offer excellence in connectivity, with a dedicated fiber optic network or connection with carriers.
