WELCOME TO BRUSSELS

Belgium has always been an important economic and business hub in Europe, and that's especially true today. Strategically located at the centre of Europe, Belgium is consistently one of the most successful countries in the EU at attracting foreign direct investment.* With close proximity to the heart of European government and NATO, Brussels has an excellent transport infrastructure that connects to all major European cities within a few hours.

Close to Brussels city centre you'll find Interxion's carrier-neutral data centre campus. It's the ideal location for national and international businesses that want to offer services anywhere in Europe and value the peace of mind that comes with colocating in one of the most secure, reliable and highly connected facilities in the area.
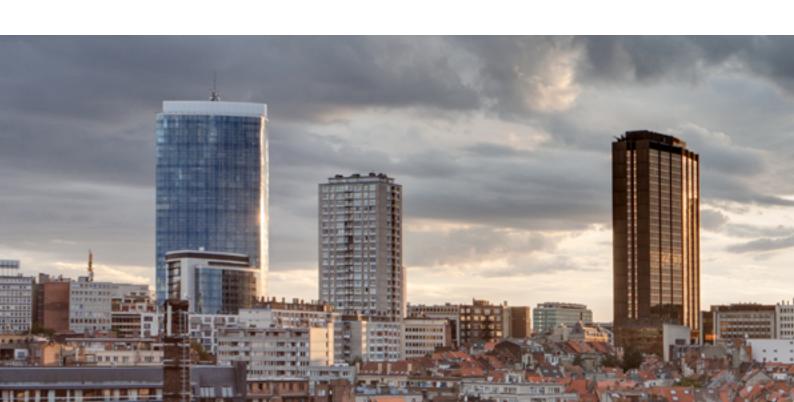

Brussels: the Gateway to Europe

For overseas companies building their presence in Europe, our Brussels data centre campus is the ideal location. Companies colocating here benefit from a top-quality, secure European data centre for their infrastructure with data stored in a central EU location, and low-latency connectivity to key European markets via a diverse community of over 100 carriers and direct access to the BNIX and NL-ix Internet exchanges.

DESIGNED FOR BUSINESS

THE CONNECTIVITY YOU NEED

Our Brussels data centre campus will support your business whether you operate within Belgium, are looking to build your presence in Europe, or want to extend your service reach right across the continent. Here we offer access to the BNIX, NL-ix, AMS-IX, LINX and DE-CIX Internet exchanges and around 100 leading national and international carriers, Internet service providers (ISPs) and content distribution networks (CDNs). Whatever the nature, size and reach of your business, you're assured of reliable, cost-effective connectivity throughout Europe, and the fastest performance for your applications.

Our Brussels campus is ideal for any business that wants to:

- Use specific carriers to reach specific markets or simply because they're your preferred choice

- Have a top-quality, highly secure and scalable European hub for misson-critical IT systems

- Build or use cloud services: because proximity to carriers and our cloud communities gives you the low latency you need

Connectivity

- Access to BNIX, NL-ix, AMS-IX, LINX, DE-CIX

- Direct access to Microsoft Azure and Amazon Web Services, IBM Cloud, Oracle Cloud Infrastructure, and Google Cloud

- Around 100 fixed and mobile carriers, ISPs and CDNs

Community

- Thriving community of System Integrators, cloud platforms and hosting providers

- Diverse enterprise community ranging from small national companies to large multinationals

Locations

- Close to Brussels city centre and Brussels South railway station

- 10 minutes' drive from the airport

Flexibility and Choice

We pioneered modular data centre design and have been refining it for more than 20 years to enable rapid and efficient campus expansion. We offer significant flexibility in how you extend your footprint and what you do with your space. Of course if you want our advice or help in purchasing or installing equipment, we're at your service.

Key services available on campus are:

- Colocation in Cabinets, Cages and Private Rooms

- SLA-backed Cross Connects

- 24x7 Hands and Eyes rapid response service

- IP multi-homing for enhanced resilience and traffic optimisation

- Access to our Customer Portal which offers anytime access to request basic tasks and services

Designed for mission-critical applications

Reliabiilty, Performance, Security

For more than 20 years we've been setting industry standards in data centre design, build, operation and management to deliver continually improving reliability, security, resilience, efficiency and performance. We offer a 99.999% availability SLA, and you're unlikely to find better reliability and performance elsewhere in Belgium.

Operational excellence

Like all our data centre campuses, Brussels has ISO 14001 and ISO 27000 certification. It has also achieved ISO 22301 certification, replacing BS 25999 as well as PCI DSS certification. We combine state-of-the-art systems and processes to monitor and manage operations 24x7, combining on-the ground local teams with centralised oversight by our 24-hour European Customer Service Centre (ECSC).

The fact that Interxion is carrier neutral is important to us. This ensures greater flexibility and allows us to negotiate on prices. Considering the sensitivity of our data and the strict Service Level Agreements with our clients, security is paramount for us. Interxion can give us the necessary guarantees in this area.

Bureau van Dijk

Resilience and business continuity

From 24x7 monitoring and alarms for every critical system to incident and business continuity management, we follow best practice and operate in accordance with the ITILv3 framework. High levels of redundancy and service assurance are built into our data centres:

- **Connectivity:** dual-entry fibre from two separate carrier main routes and rapidly installed Cross Connects.

- **Power:** secured supply; two power feeds for all equipment, each independently equipped with UPS and generator backup with full load capacity for indefinite running.

- **Environment:** SLAs on temperature and humidity in line with ASHRAE recommendations; N+1 cooling; sophisticated water and smoke detection systems; advanced fire suppression in line with local regulations and designed for maximum safety and minimum damage.

Security

The entire data centre campus is monitored 24x7 by CCTV and security patrols. There are multiple access barriers, including mantraps and contactless key cards. You can also add your own security systems to a Cabinet, Cage or Private Room.
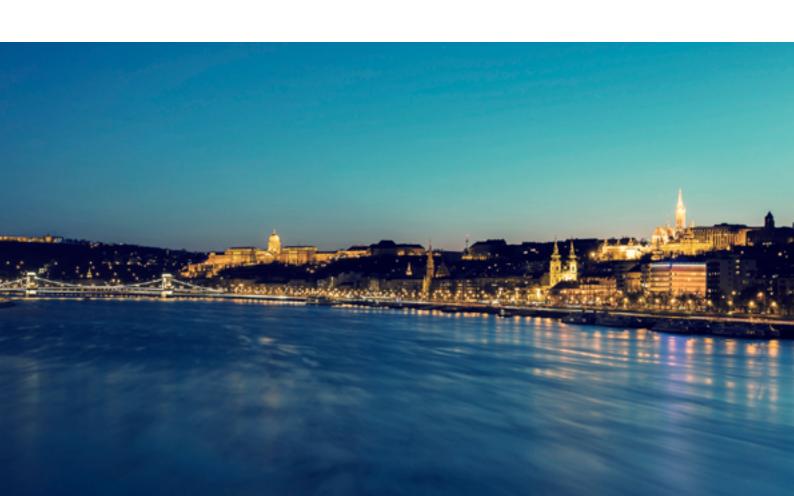

Sustainability

Our PUE measures are exceptional by any standards. We use free cooling and a custom cold-aisle containment solution to support higher power densities on low raised floors more efficiently, reducing the overall cooling overhead by as much as 30%.

Interxion have demonstrated a deep understanding of our infrastructure needs, advising on efficiency improvements that have increased our processing power per cabinet by up to 50 per cent.

Massive Media Match

Local and central teams at your service

Customers value the quality of our operations and customer service. We centralise functions where possible, and have strong local management, operational, service delivery and assurance teams, enabling us to deliver a more efficient, consistent, responsive and personal service to you.

Dedicated support

Our centralised ECSC team is fluent in English, French, German, Dutch and Spanish. They give you a single point of contact, 24x7, for all enquiries and keep you informed of anything that has the slightest chance of affecting your systems. Our customers tell us that they really appreciate the level of engagement they get from us and the control it gives them over the mission-critical systems they host with us.

The local team

The Brussels team not only runs the data centre day-to-day but can provide you with knowledge of local markets and regulatory environments as needed. They're on hand if you want advice or help in optimising use of your space, from design and connectivity to installation and management.

Frederik Dewulf,
Managing Director, Belgium

About Interxion

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 50 data centres in 11 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 700 connectivity providers, 21 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.
