

Dublin
Data Centre Campus

Connect, transact and grow

WELCOME TO DUBLIN

The only English-speaking member of the Eurozone, Ireland combines a pro-business approach, an attractive corporate tax rate and a highly educated workforce with a prime location on the axis between the American and European continents. Small wonder it's the destination of choice for US-based and other international companies that want to establish a European presence.

Close to Dublin city centre you'll find our network-neutral data centre campus. It's the ideal location for national and international businesses that want to offer services anywhere in Europe and value the peace of mind that comes with colocating in one of the most secure, reliable and highly connected facilities in the area.

// *Fundamental to the value euNetworks delivers to our customers is our last-mile fibre networks in major European cities. Interxion's pan-European footprint has made them an ideal partner to help us deliver the benefits of our high-capacity network to our target customers.*

euNetworks

Designed for business

Highly connected, network-neutral

Our Dublin data centre campus will support your business whether you operate within Ireland, are looking to build your presence in Europe, or want to extend your service reach right across the continent. With carrier points of presence (PoPs) already installed in the data centre and Cross Connects that can be implemented quickly, it's easy to connect to the carriers of your choice.

Our interconnection hub is home to the Ireland's Internet Neutral Exchange (INEX) and to over 45 leading national and international carriers, Internet service providers (ISPs) and content distribution networks (CDNs). Whatever the nature, size and reach of your business, you're assured of reliable, cost effective connectivity throughout Europe, and the fastest performance for your applications.

ISPs and CDNs

24x7

dedicated
support

Connectivity

- Direct access to INEX
- 45+ fixed and mobile carriers, ISPs and CDNs

Community

- Thriving community of SIs, cloud platforms and hosting providers
- Diverse enterprise community ranging from small national companies to large multinationals

Location

- 8km from the city centre
- 25km from Dublin airport

Flexibility and choice

We pioneered modular data centre design and have been refining it for over 15 years to enable rapid and efficient expansion. We offer significant flexibility in what you do with your space and how you extend your footprint. If you want advice or help in purchasing or installing equipment, we're at your service.

The on-campus team can advise on best practice for cabling, cooling, and power delivery and management, and help you make the best choices on leased lines, IP transit, peering arrangements and physical cabling.

The key services available on campus are:

- Colocation in Cabinets, Cages or Private Rooms
- Rapidly installed Cross Connects
- 24x7 Hands and Eyes technical support service
- Meeting rooms and office space

Reliability, performance, security

For more than 15 years we've been setting industry standards in data centre design, build, operation and management to deliver continually improving reliability, security, resilience, efficiency and performance. We offer a 99.999% availability SLA, and you're unlikely to find better reliability and performance elsewhere in Dublin.

Operational excellence

Like all our data centre campuses, Dublin has ISO 9001 and ISO 27000 certification. It has also achieved ISO 22301 certification, replacing BS 25999. We combine state-of-the-art systems and processes to monitor and manage operations 24x7, combining on-the-ground local teams with centralized oversight by our 24-hour European Customer Service Centre (ECSC).

// *Not only can Interxion provide the footprint we need for our infrastructure, they can also facilitate offices for our full-time team who manage the data centre environment. We have guaranteed state-of-the-art technology, technical support and industry experience.*

LeasePlan

Resilience and business continuity

From 24x7 monitoring and alarms for every critical system to incident and business continuity management, we follow best practice and operate in accordance with the ITILv3 framework. High levels of redundancy and service assurance are built into our data centres:

- **Connectivity:** dual-entry fibre from two separate carrier main routes and rapidly installed Cross Connects.
- **Power:** secured supply; two power feeds for all equipment, each independently equipped with UPS and generator backup with full load capacity for indefinite running.
- **Environment:** SLAs on temperature and humidity in line with ASHRAE recommendations; N+1 cooling; sophisticated water and smoke detection systems; advanced fire suppression in line with local regulations and designed for maximum safety and minimum damage.

Security

The entire data centre campus is monitored 24x7 by CCTV and security patrols. There are multiple access barriers, including mantraps, contactless key cards and biometric readers. You can also add your own security systems to a Private Room.

Sustainability

Our PUE measures are exceptional by any standards. We use free cooling and a custom cold-aisle containment solution to support higher power densities on low raised floors more efficiently, reducing the overall cooling overhead by as much as 30%.

Operational excellence

- 99.999% availability SLA
- 2N or N+1 configurations for all critical systems
- 24x7 operation and monitoring
- Exceptional PUE measures

Local and central teams at your service

Customers value the quality of our operations and customer service. We centralize functions where possible, and have strong local management, operational, service delivery and assurance teams, enabling us to deliver a more efficient, consistent, responsive and personal service to you.

Dedicated support

Our centralised ECSC team is fluent in English, French, German, Dutch and Spanish. They give you a single point of contact, 24x7, for all enquiries and keep you informed of anything that has the slightest chance of affecting your systems. Our customers tell us that they really appreciate the level of engagement they get from us and the control it gives them over the mission-critical systems they host with us.

The local team

The Dublin team not only runs the data centre day-to-day but can provide you with knowledge of local markets and regulatory environments as needed. They're on hand if you want advice or help in optimising use of your space, from design and connectivity to installation and management.

Séamus Dunne,
Managing Director, Ireland

About Interxion

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 50 data centres in 11 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 700 connectivity providers, 21 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.
