

A wide-angle, nighttime photograph of Vienna, Austria, showing the city's lights, the Danube River, and a prominent skyscraper (the Sky Tower) in the background.

VIE2 (VIENNA)

LOCATION

Louis-Haefliger-Gasse 10, 1210

The optimum infrastructure for your applications and systems

Our VIE2 data centre offers the latest secure, scalable infrastructure specially designed for failsafe, efficient and sustainable operation of mission-critical applications and systems. VIE2 opened in 2014 and is located on land owned by Interxion, which is Austria's busiest data centre hub. Connectivity, power and security will be fully provided and controlled by Interxion.

Located in the north of Vienna, the data centre offers a multiple redundant infrastructure to meet all requirements in terms of reliability and performance. VIE2 offers redundant power supply and air-conditioning (2N/N+1 configuration) and supports even the most demanding high-density configurations. Interxion's high-security data centre is equipped with the most advanced alarm and monitoring systems.

To ensure maximum energy efficiency, VIE2 has been designed with the focus on energy-saving, modular architecture with adiabatic cooling and maximum-efficiency components as standard.

At a glance

- Newly built and equipped space (VIE2), Q4 2014 first phase of construction with 1,200m², expandable up to 5,500 m²
- More than 110 Carriers/ISPs and VIX Internet exchange on-site
- Trained security staff on-site 24x7/ security guards
- Trained technical staff on-site 24x7/ certified facility engineers
- Advanced fire detection and suppression systems
- ISO/IEC 27001 Information Security Management certified
- ISO 22301 Business Continuity Management certified
- Office and storage space available

About Interxion

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 45 data centres in 11 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 700 connectivity providers, 21 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.

For more information, please visit www.interxion.com

Data Centre

- More than 1,200m² of newly built and equipped space. Further 4,300m² of expansion space can be provided in subsequent phases
- Conveniently located - 25km from Vienna's airport and a few minutes walk from the nearest public transport, 7km from Vienna City
- Modular and redundant set up of fault-tolerant infrastructure
- Dedicated antenna space available
- Trained technical staff on campus 24x7/certified facility engineers and security guards

Interconnection

- Dual-entry, redundant fibre connections as well as high performance connections between VIE1 and VIE2
- Access to over 110 carriers/ISPs
- VIX Internet Exchange
- Redundant Meet-Me-Rooms
- SLA-based cross connects available to all Interxion customers in Vienna

Power

- 2N UPS redundancy
- N+1 generator backup with SLA on refueling
- Indefinite diesel capacity with SLA
- Up to 99,999% availability SLA
- High-density power configurations of up to 15kW per cabinet
- Full range of AC and DC output currents

Security

- Trained security staff on-site (24x7)/ 2 security guards (24/7)
- Multiple physical security layers including contactless key cards, biometric access system, CCTV, man traps
- 24x7 controlled access
- ISO/IEC 27001 Information Security Management certified
- ISO 22301 Business Continuity Management certified

Controlled Environment

- Advanced smoke detection systems in every customer room (VESDA)
- Inergen gas fire suppression system
- Fire separation walls (F90)
- SLAs on temperature and humidity in line with ASHRAE recommendations
- Minimum N+1 CRAC redundancy per room

- Redundant cold water supplies
- Entire facility infrastructure monitored 24x7 (Chiller, CRAC, Fire Panels, Generator, UPS etc.)

Services

- Colocation: cabinet, Cage and Private Rooms available
- Hands and Eyes: 24x7 installation and maintenance
- Extendable to over 45 data centres across Europe via a single service contract
- Meeting rooms and office space available
- Staging area/storage space
- Customer lounge in VIE's main building

Energy efficiency and sustainability

- Renewable energy - in VIE 100% hydropower
- Phased modular architecture optimizes Power Usage Effectiveness (PUE)
- Data centres operated to the highest energy efficiency standards
- Adiabatic cooling, strict separation of warm and cold air flows

Customer Support

- ISO 22301 Certification – British Standards Institution (BSI) standard for Business Continuity Management.
- ISO/IEC 27001 – accredited European Customer Support Centre (ECSC) provides support in 11 countries to the same rigorous standards
- 24x7 facility and service monitoring
- Multilingual response (German, English, French, Spanish)
