Legend

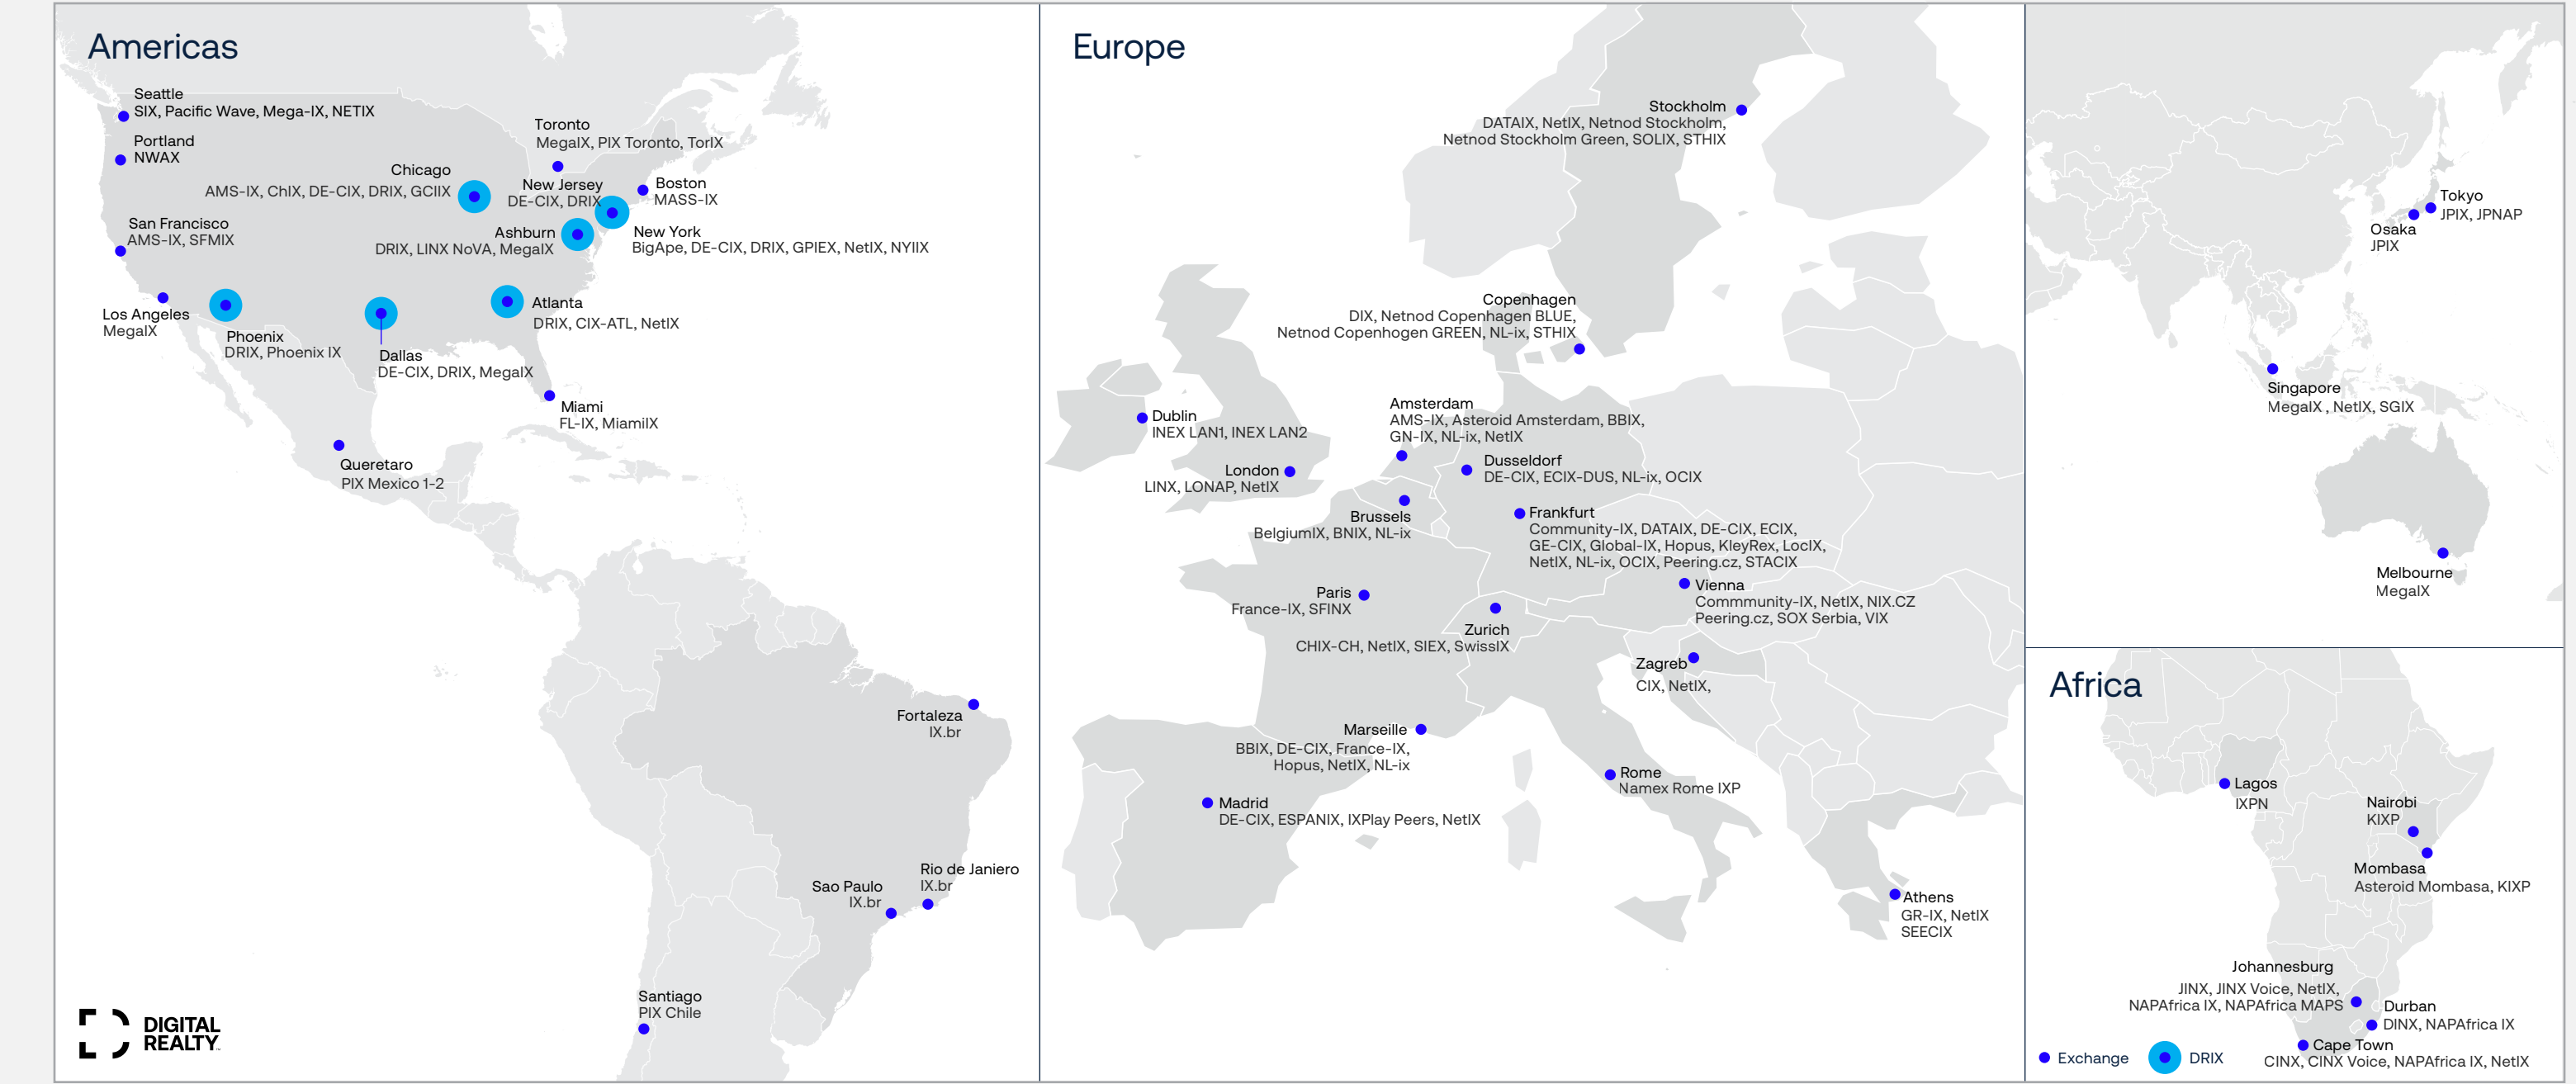

- Serviced metro area
- Control Hub
- Data Hub
- Network Hub
- Submarine cable near serviced metro area
- Other submarine cable
- Planned submarine cable

Submarine cables depicted on the main projection include all active international and domestic submarine cables and planned cables. In-service cables have a service start by September 2023. Planned cables include those under construction. Map does not depict proposed cables that have not announced launch or configuration. Cable routes are displayed and do not reflect physical cable location. This work is based upon sources believed to be reliable, but the publisher does not warrant the accuracy or completeness of any information for any purpose and is not responsible for any errors or omissions.

Submarine cable data updated annually.
